

VENTA table with special grill area

Table with a invisible TEPPANYAKI field. In standby mode the table surface is absolute flat, but by turning on the heat a bowl (diameter = 40 cm, depth = 2 cm) will be visible in the middle of the table. Around this hot area (max. 220°C) is a ring of 10 cm to keep the food warm (max. 70°C). Outside of this area the table surface stays cool. That's magic.
